

Whether you don't or you do, we all need to get through!

We all acknowledge that parking within the local villages is difficult at the best of times and many people use public footpaths in front of their property to partially park on.

If you have to do this, could you please consider the many local residents who use the footpath to navigate around the village, in particular wheelchair users, parents with prams and elderly residents who may need assistance.

Please leave a minimum of one metre to allow for adequate pedestrian access along all footpaths within the village.
